

PRO ENERGY LIQUID SUPPLEMENTS

"I've been using Pro Energy feed continuous for two years. We are able to wean calves in September weighing 700 pounds, even in drought conditions. This feed dominates any other feed, and we've tried them all."

— Keith Wright, Wright Cattle Company
Muskogee and McIntosh Counties, Oklahoma
1,500 brood cows

"On our farms, we background Holstein steers from 300 to 700 pounds. We have found that with today's rising feed costs, Pro Energy feeds' cost-to-gain ratio is very efficient."

— Curt and Darren Ransdell, Ransdell Farms
Harrodsburg, Kentucky
2,000 Holstein steers

*Products based on
liquid feed syrup from
the corn milling process.*

DOUBLE S
LIQUID FEED SERVICES, INC.

Double S Liquid Feed Services Inc. is pleased to partner with **Pro-Energy Feeds** of Blue Jacket, OK, to offer their line of free-choice liquid feeds to the Double S market area.

Why Pro Energy? Pro Energy liquid feeds have a 20-year proven track record of providing consistent, quality, commodity-based free-choice feeds that deliver outstanding performance at an economical price. Larry and Beverly Sutton, Pro-Energy owners and ranchers themselves, understand the value of a dollar. Because Pro Energy liquid feeds have a long and proven history of providing exceptional performance, we feel comfortable and confident that they will perform for you.

What is Pro Energy? Pro Energy is a product line based on liquid feed syrup from the corn milling process. This standardized, consistent product is combined with other ingredients, including fat sources, vitamins and a proprietary enzyme and probiotic package to provide a product line that can feed cattle from 300 pounds to the brood cow herd. Although protein levels are up to 20%, there is no urea used.

How to select a product: In general, lower protein products are for smaller calves and will encourage consumption. To slow down consumption and for larger yearlings and brood cows, use higher protein products.

Calf Booster

Crude Protein	14%
Crude Fat	2.5%
Crude Fiber, not more than	0.5%
Vitamin A, min	20,000 IU/lb
Vitamin D, min	5,000 IU/lb
Vitamin E, min	5 IU/lb
Moisture, not more than	50%

PE 16-5

Crude Protein	16%
Crude Fat	5%
Crude Fiber, not more than	0.5%
Vitamin A, min	20,000 IU/lb
Vitamin D, min	5,000 IU/lb
Vitamin E, min	5 IU/lb
Moisture, not more than	50%

PE 18-5

Crude Protein	18%
Crude Fat	5%
Crude Fiber, not more than	0.2%
Vitamin A, min	20,000 IU/lb
Vitamin D, min	5,000 IU/lb
Vitamin E, min	5 IU/lb
Moisture, not more than	50%
